Facebook Messenger is the most commonly used application to socialize globally anywhere in the world, but there are some problems in using Facebook Messenger each time as using the application outside of Wi-Fi cafes, hospitals etc. Why? © requires a lot of data pack for all the features that are expensive to use without Wi-Fi connection. So it is an emerging problem in many areas globally so, Facebook Messenger Lite application launched that includes all the features of Facebook Messenger Application. This application is available on both Apple and Android app store and easily downloadable. In some countries this application is very useful in socializing outside the home. This application works like the messenger app chat with people connected by sending them inviting events, storing plans and all the functionalities accessible upon messenger request. This application gives all the features of Facebook Messenger with low data packets. This litigation version of the application is very useful to get rid of the extra features of the messenger app such as GIFS and Stories. This litigation version application has also cut the features that damage the data package in the background. The main advantage of this application is to allow the user to save space and save data by avoiding some features that are generally available in the messenger application. There are three main reasons to use this litigation version application. It requires much less data from the data package, which means it is easy to use and access in the bad data connection that saves time and data. This application cannot receive large data files such as images and gifs because of its slimming code already running this application which means that files cannot use the data connection. It is the best tool for why © works on old devices. The main purpose of this application is to perform on many old devices as much as possible. So because of this the old and unsupported mobile devices will be able to perform this efficiently use the features of Facebook Messenger. Finally this application also provides many of the additional features that have been added to Facebook Messenger. Basically this application is a chat app, although it does not have all the features of the Facebook application. 341.0. 0.6. 237 Dec 7a, 2021 340.0. 0.11. 119 Dec 1a, 2021 339.0. 0.18. 118 Twenty-first, 2021 339.0. 0.16. 118 Nov 19, 2021 339.0.
